Warp, Weft and Filler
can be any combination or
blends of fiber types.

FIG. 22

FIG. 23

Yarns Can be treated with Various Chemical or Physical Treatments.

In the illustration below the colors are used as a code to show the random type pattern created by the different yarns, the actual carpet would be all white. The variation in the yarns would only become visible after the post dye application of pattern and then it would show as a subtle effect throughout the carpet

Yellow Represents
a yarn that has been Chemically
Treated to have a certain percent
Resistance to the dye color

The Black represents
a yarn that may have
a bright fiber and a dull
fiber blended, or it may
be a higher twist than
the others.

Green Represents
Untreated
Yarn
